**MONOCOLOR**

# INDUSTRIAL SIGN & LABEL PRINTING AT YOUR FINGERTIPS

Creating on demand signs & labels in-house has never been easier with the Globalmark Monocolor system.

Touch screen technology, a large graphical display and the innovative Windows CE\* system have been combined to achieve unequalled ease of use.

One of the key advantages of Globalmark is that it can be used either connected to your PC or stand-alone, giving equally high quality output but a greater level of portability and higher operation speed. Unique legends, pipe markers, safety signs, equipment tags, labels, fire and rescue directional and information layouts are all built-in. With the file management utility you can easily import logos and other graphics and print these directly from the Globalmark.

Globalmark Monocolor prints on Standard Vinyl (B-978), but can also be used with all of Brady's high performance materials designed to meet the exacting and often harsh environments found in a modern work place.
